

# YOUR MOBILE APPOINTMENT

What to expect in your home visit session with Kirsty

## PRE APPOINTMENT

Pre-screen & consultation will take place prior to appointment by phone or video call. For new patients, evaluation & assessment will take place via video call.

This is to minimise face to face contact time but still offer a personal treatment.

## CROSS INFECTION

Only linen & equipment required for your personal session will be brought to the visit in a cleanable, sealed box - ALL freshly washed and single-use.

My work clothes will be fresh on for each household visit.

I will be in PPE.

## WHAT I NEED FROM YOU...

I need to gain access to the treatment space seamlessly, with minimal contact with other household members.

If you are able to ventilate the room before/during/after treatment, this is advisable.

If you are symptomatic please cancel.

## ON ARRIVAL & SETUP

Everything will be pre-cleaned before/on arrival.

I will enter and set up as seamlessly as possible, leaving certain bags outside.

I will be in relevant PPE.

When ready, I will invite you to the space for your treatment

## POST TREATMENT

I will be taking many precautions to minimise risk before, throughout & after my arrival. After the treatment please leave & let me clean - this may take a little longer than usual. Post treatment after care & appointment setting will be done via phone afterwards.
